WINERIES	726	GPD	

FOOTNOTES: *

1. Lobby of retail includes lounges, holding rooms, or waiting area, etc.
2. Cold storage facilities are categorized as follow:
 - a. No sales - cold storage facility is used only for temporary storage, no selling is involved.
For example, cold storage facilities at the harbor temporarily store seafood until it is distributed.
 - b. Cold storage w/ retail sales - the primary function of this facility is to support the wholesale/retail operation of a store, such as supermarket freezers, refrigerators, etc.
3. Building construction includes trailers, field offices, etc.
4. The SFC for a bar shall be the sum of SFC's for all areas based on the SGF for each area (ex. fixed seat area, public table area, dancing area.)
5. Counseling centers include marriage counseling centers, alcohol/drug rehabilitation/dependency centers, nutrition centers, diet centers, etc.
6. A bedroom is defined as an enclosed subdivision with 50 sq. ft. or more floor area in a residential building commonly used for sleeping purpose, and is partitioned off to form a habitable room.
7. Bureau of Sanitation will determine the flow base on the information given by applicants for facilities with industrial discharge. The flow will be redetermined by Sanitation inspectors annually base on waterbills. If the actual flow exceeds the previous year determined flow, the applicants will be charged for the difference. Please refer to the Sewerage Facilities Charge for industrial customers. If this type of facility is exempt from an industrial discharge permit, only the domestic SFC will be assessed.
8. The SGF for schools based on the student capacity, covers the following facilities:
 - a. classrooms and lecture halls
 - b. professors' offices
 - c. administration offices
 - d. laboratories for classes or research
 - e. libraries
 - f. bookstores
 - g. student/professor lounges
 - h. school cafeterias
 - i. warehouses and storage areas
 - j. auditoriums
 - k. gymnasiums

When a school files an application for addition of any of the foregoing facilities, the student population will be reassessed and the total gpd for the new facility will be based on the number of students increased since the last SFC was paid or when the City implemented the SFC for the first time. The SFC for any school facility (ex. stadium, dormitory, etc.) not listed above, will be based on the designated SGF for the category.
9. Part-time basis schools or dance studios should be charged as retail area - 80gpd/1000gr.sq.ft. Full-time basis schools should be charged by the number of students.
10. Bureau of Sanitation will determine if an industrial permit is needed for health spas. The first year flow is based on 800 gpd/1000gr.sq.ft., and the Sanitation inspectors will redetermine the flow annually base on waterbill from the previous year. The applicants are responsible for paying the difference of SFC. Health club/spa includes lobby area, workout floors, aerobic rooms, swimming pools, Jacuzzi, sauna, locker rooms, showers, and restrooms. If a health club/spa has a gymnasium type of facility, this portion should be charged separately at the gymnasium SFC rate. Gymnasiums include basketball court, volleyball court, and any other large open space with low occupancy density.
11. No independent tanning salons with shower was encountered during survey.
12. The SGF for a college dormitory based on student capacity also includes the SGF for the dormitory cafeterias.
13. The SGF for a TV or motion picture studio shall be the sum of SFC's for different facilities in the studio, based on the SGF for each facility. A studio may include one or more of the following facilities: audience viewing room, filming room, film processing, storage area, etc.
14. Full service post offices include U.S. Postal Service, UPS, Federal Express, DHL, and etc.
15. The determination of SGF for juice bars and coffee houses depends on the extent of the actual food preparation in house, not by the types of food provided.
 - a. SGF for no pastry baking and no food preparation is 120gpd/1000gr.sq.ft.
 - b. SGF for pastry baking only and no food preparation is 280gpd/1000 gr.sq.ft.
 - c. SGF for complete food preparation is 30 gpd/seat.

For example, a juice bar that offers doughnuts or pastries purchased from food wholesale dealers, should be considered as a facility with no pastry baking. Juice bars and coffee houses do not serve any alcoholic drinks.
16. Cocktail lounge usually does not serve prepared food.
