

REQUESTING A FREE STREET TREE

How It Works

STEP 1

Sign Up Online

Verify that you live in the City of Los Angeles and apply on our website.

STEP 2

Sit back & relax as we take care of permitting and planting

If you qualify and if there is space for a tree, we will send out an inspector and certified arborist to select the best location and tree species to plant in your parkway. We follow the City of Los Angeles' Street Tree Planting guidelines.

STEP 3

Water and care for your trees once they are planted

Once your tree is planted, it will need water for the first 3-5 years while its roots grow into the ground. A little effort now will pay off big in the future!
