

Facts about your Sewer Service Charge (SSC):

Your City Municipal Services bill, sent with your Department of Water and Power (DWP) bill, includes a Sewer Service Charge (SSC) based on the amount of water you use. The SSC is calculated in this manner because most of that water eventually goes down the drain and into the sewer system.

This brochure will briefly explain how your SSC is calculated, the types of SSC adjustments you may qualify for and ways to minimize your SSC. For more information, visit our web site www.lacitysan.org/ssc.

For most residential customers here's how it works:

1. On July 1 of each year, we calculate your average daily winter water use (WWU) by selecting the billing period of the previous winter that had the lowest average daily water consumption. This daily average is shown in hundreds of cubic feet per day or HCF/day (1 HCF = 748 gallons).
2. To account for winter irrigation, we usually reduce the WWU by using a "dry winter compensation factor" (DWCF) in the calculation. This year's DWCF is 0.83. This is your Average Daily Sewage Volume (ADSV).
3. Once we've determined your ADSV, for billing purposes, your sewage flow remains the same from July 1 to June 30.
4. Finally, to calculate your bi-monthly SSC, we multiply your ADSV by the SSC rate (currently \$5.80 per HCF), and then by the number of days in the current billing cycle:

$$\text{ADSV} \times \text{SSC rate} \times \text{billing cycle days}$$

Here is an example:

Last winter, during a 61 day billing period in the winter/rainy season, homeowner Ana used 16 hundred cubic feet of water or 16 HCF. This year the dry winter compensation factor is 0.83.

Ana's WWU is calculated as

$$16 \text{ HCF} / 61 \text{ days} = 0.26230 \text{ HCF/day}$$

Apply the dry winter compensation factor of 0.83

$$0.83 \times 0.26230 \text{ HCF/day} = 0.21771 \text{ HCF/day}$$

Ana's **sewage volume** is 0.21771 HCF/day and there are 59 days in the current billing period so

$$\text{Sewage Volume} = 0.21771 \times 59 = 12.84489 \text{ HCF}$$

The SSC rate is currently \$5.80 per HCF, so

$$\text{SSC} = 12.84489 \times \$5.80 = \$74.50$$

Ana's Sewer Service Charge for the current billing period is \$74.50. This is only an example; do not mail this amount as a payment.

NOTE: Your WWU will vary depending on your water usage during the previous winter. If you are a new customer without a water history, your bills will be calculated using the city median WWU. When you have been in your home long enough to establish a winter water use history, you will be billed accordingly starting in July of that year.

Your dollars at work!

Effective April 6, 2012, the City of Los Angeles approved a series of rate adjustments that will provide a sustainable funding level for the wastewater program. These are the rates for the next couple of years:

Effective Date	July 1,		
	2018	2019	2020
New Rate (\$/HCF)	5.11	5.44	5.80

The additional revenue is being used to increase system reliability and production of renewable and economic power to protect public health and the environment.

As a covered entity under Title II of the Americans with Disabilities Act, the City of Los Angeles does not discriminate on the basis of disability and, upon request, will provide reasonable accommodation to ensure equal access to its programs, services and activities.

Information about your Sewer Service Charge

September 2020
ZERO WASTE - ONE WATER

SSC for commercial customers:

SSC = SSC rate x amount of water used during billing period (in HCF) x 93%.

NOTE: Commercial customers (businesses, industries, government, other non-residential properties, and multi-family residences with five or more units) typically discharge 93% of the water they use into the City's sewers.

SSC for customers with water sub-meters:

If you have a water sub-meter, the water you use and discharge into the City's sewers will be measured and billed as follows:

SSC = SSC rate x volume of domestic water used for the billing period (in HCF)

NOTE: Water sub-meters may often be beneficial for properties that cannot significantly reduce irrigation (for example, large lots). Before you install a water sub-meter, please call 800 773-2489 to request a residential or commercial water sub-meter information package to determine if the program will benefit you.

You may qualify for an adjustment to your SSC if:

- You refilled an empty swimming pool, planted a new lawn, or had water leaks during the winter rainy season
- Your property has been vacant for an entire billing period
- You have irrigation-only meters
- Your residential property has been billed as commercial property
- Your commercial property has been billed as residential property
- Your commercial property uses a significant amount of water for a product, cooling tower, or irrigation
- Your commercial property discharges low-strength sewage
- Your commercial property had a large water leak not tributary to the sewer

Some adjustments are time sensitive, so please submit your requests within 30 days of receiving your bill.

You may qualify for a refund* of your SSC if:

- Your premise is served by a County Sanitation District (look at your property tax bill to determine)
- Your premise is not connected to the city sewer

**The refund will be applied to the entire period of incorrect billings.*

It is important that you keep the name on your Municipal Services account current and accurate. If not, you may not be eligible for refunds on your bill.

You may qualify for a low-income subsidy - call 800 342-5397 for details

What your SSC covers:

- Maintenance, upgrades, and replacement of 6,700 miles of aging sewer infrastructure in the City of Los Angeles
- Exceptional quality treatment of more than 330 million gallons of wastewater collected each day at four wastewater treatment and water reclamation plants
- More than 28 billion gallons of recycled water produced annually
- More than 350,000 tests performed annually to monitor and protect the environment

Protect your sewer and wastewater system:

- Don't pour fats, oil, or grease down the drain
- Don't flush or pour medicine down the drain
- Don't flush SHARPS (needles, syringes)
- Don't pour hazardous materials down the drain (paint, solvents, used oil); take them to a hazardous waste disposal center (S.A.F.E. Center).
- Don't plant trees near your sewer lateral – the roots can block your lateral.

To lower your SSC and water bill try these Water Saving Tips

OUTSIDE YOUR HOME

- Avoid over watering by installing low-flow sprinkler heads and timers; minimize watering in winter months or use climate-sensitive controllers
- Water early in the morning or late in the evening and only when the plants need it
- Replace your lawn with native, drought-tolerant plants

INSIDE YOUR HOME

- Fix leaky faucets and toilets (keep receipts to qualify for a possible adjustment to your SSC)
- Install ultra low-flow toilets, shower-heads, and other fixtures
- Replace older, inefficient appliances (check LADWP website for potential rebates)
- Wash only full loads of laundry or dishes
- Shorten showers
- Don't use the toilet as a wastebasket
