**RE: ENFORCEMENT AGENCY NOTIFICATION FOR USE OF A PORTION OF "A DECK" AT
LOPEZ CANYON LANDFILL FOR A DRIVER TRAINING ACADEMY**

The Bureau of Sanitation (BoS) is submitting this notification of a post closure use on a 3.21 acre portion of "A Deck" at Lopez Canyon Landfill for a Truck Driver Training Academy consistent with the approval of the current operation at Greenwaste Processing Facility. Closure work has been completed on "A Deck". It is capped with a minimum of three feet of monocovert over a minimum of two feet foundation layer. In addition, the proposed project area will be paved with six inches of asphalt concrete over six inches of asphalt grindings as a base (see attached detail). This detail was approved by your office and by the RWCQB as an acceptable cover for "B Deck", currently used for Greenwaste Processing Facility.

The green waste processing operation currently conducted on "B Deck," was eventually going to be expanded over "A Deck" to accommodate the delivery of compost/mulch to designated sites throughout Southern California. The extension of "A Deck" for driver training is consistent with the use set forth in the CEQA document prepared for expansion of the green waste processing operation. Additionally, a community meeting was held on February 27, 2008 and the plan of the Driving Academy was well received by the nearby residents of Lake View Terrace and the Kagel Canyon community.

If you have any questions or comments, please contact Javier Polanco of my staff at (213) 485-3062.

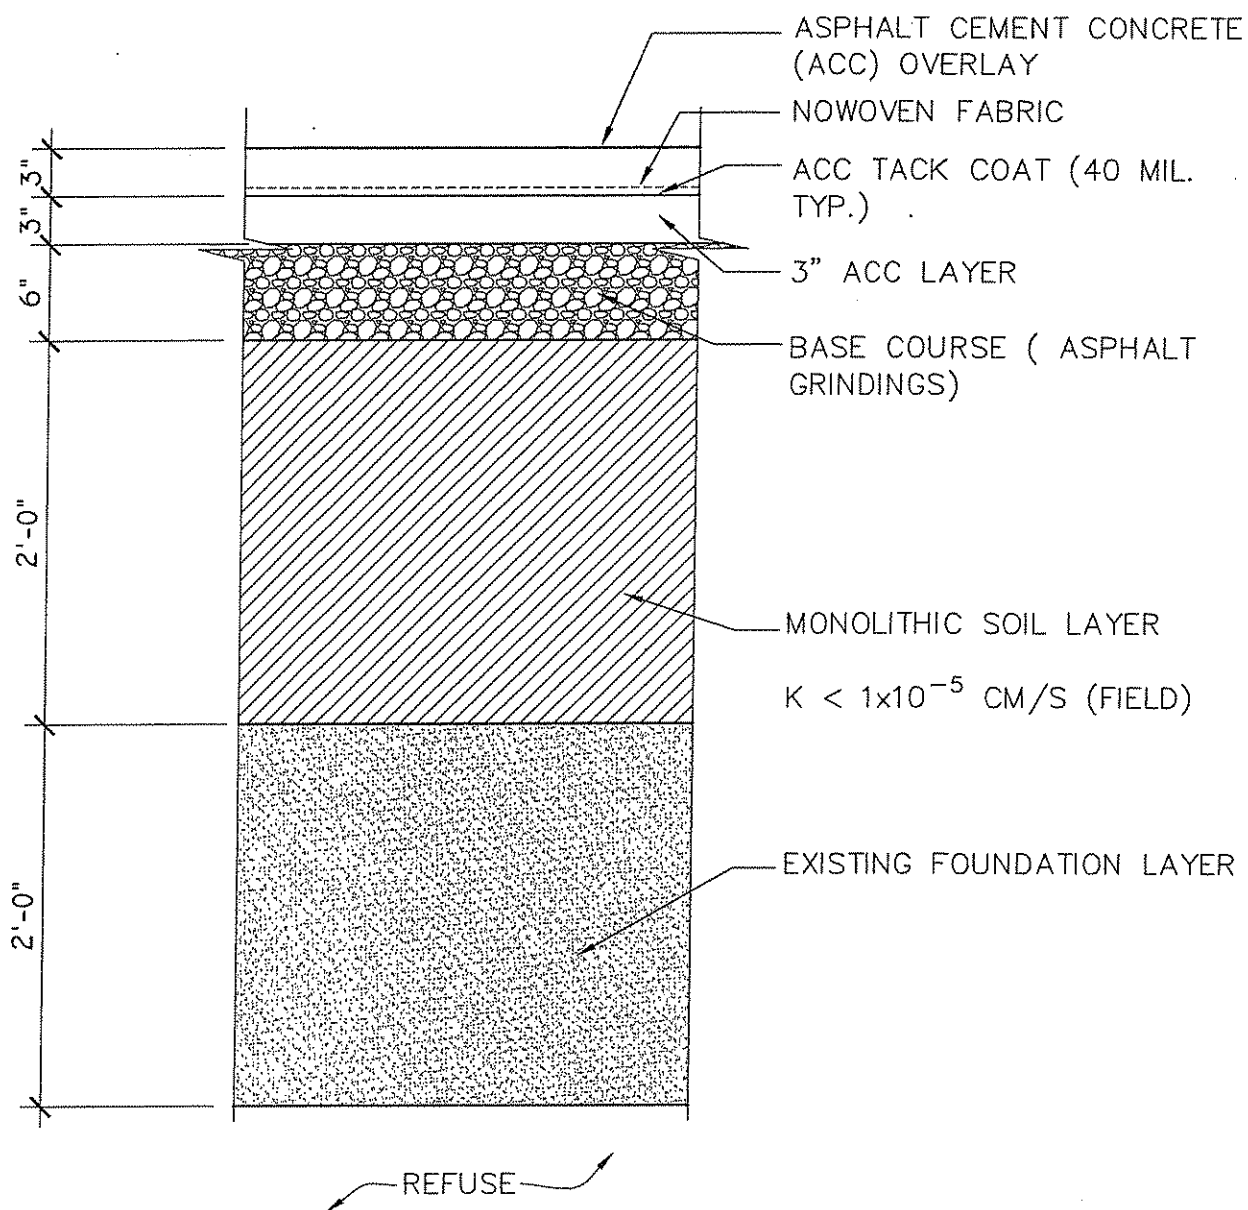

Sincerely,

Khalil M. Gharios, Division Manager
Solid Resources Processing and Construction Division
